Ravenshaw University

2018/06 – 2020/05
Jajpur, Odisha

Higher Secondary Education
Tetrahedron Jr Science College

Projects

Parking Management System:

A parking management system project typically involves developing a technology-driven solution to manage parking facilities efficiently. This system can be implemented using various technologies such as PHP, MySQL, Python, and IoT.

Jarvis Voice Assistance:

Developed a Python-based Jarvis voice assistant capable of recognizing speech, responding via text-to-speech, playing YouTube songs, answering Wikipedia queries, telling jokes, and reporting time. Integrated libraries like SpeechRecognition, pyttsx3, and pywhatkit for intelligent and interactive voice automation.
